(54) Title: A MOBILE TERMINAL WITH A HINGE, A METHOD OF OPERATING THE MOBILE TERMINAL AND A HINGE

(57) Abstract: A mobile terminal, such as a mobile telephone, has a hinge with a helical spring and which provides both snap opening or automatic opening upon activation of a release means as well as a freely selectable angular position between the rotating parts of the terminal. Also a new type of spring hinges or clutches are described for use in e.g. this type of terminal.
